

UNIVERSITY OF THESSALY

Subject: Daily mean values of PM_{2.5} for the period from 04/01/2021 to 10/01/2021 in the region of Volos

The research team of the University of Thessaly, GreenYourAir, with scientific supervisors Associate Professor George K.D. Saharidis of the Department of Mechanical Engineering of the University of Thessaly and Professor Konstantinos Gourgoulianis, Director of the University Pulmonary Clinic of the University of Thessaly, informs the citizens of Volos about the daily average concentration values of micro particles PM_{2.5} in the region of Volos for the period 04/01/2021 till 10/01/2021.

Daily mean values of PM_{2.5} from 04/01/2021 to 10/01/2021	
Date	PM_{2.5} (µg/m³)
04/01/2021	46.28
05/01/2021	28.26
06/01/2021	45.75
07/01/2021	16.15
08/01/2021	9.66
09/01/2021	21.8
10/01/2021	21.65

The measurements are based on GreenYourAir's network that consists of 12 measuring devices of PM_{2.5} concentration. Citizens can be informed about the values of PM_{2.5} concentration in real time from the unique online network in the city of Volos, through the website <http://greenyourair.org/>.

The diagram below shows the instantaneous values of the PM_{2.5} concentration for the period from 04/01/2021 to 10/01/2021.

Daily mean values of PM_{2.5} from 04/01/2021 to 10/01/2021 in the region of Volos
