

UNIVERSITY OF  
THESSALY

**Subject: Daily mean values of PM<sub>2.5</sub> for the period from 07/12/2020 to 13/12/2020 in the region of Volos**

The research team of the University of Thessaly, GreenYourAir, with scientific supervisors Associate Professor George K.D. Saharidis of the Department of Mechanical Engineering of the University of Thessaly and Professor Konstantinos Gourgoulianis, Director of the University Pulmonary Clinic of the University of Thessaly, informs the citizens of Volos about the daily average concentration values of micro particles PM<sub>2.5</sub> in the region of Volos for the period 07/12/2020 till 13/12/2020.

Daily mean values of PM <sub>2.5</sub> from 07/12/2020 to 13/12/2020	
Date	PM <sub>2.5</sub> (µg/m <sup>3</sup> )
07/12/2020	29.32
08/12/2020	44.38
09/12/2020	17.24
10/12/2020	27.87
11/12/2020	28.25
12/12/2020	42.72
13/12/2020	43.31

The measurements are based on GreenYourAir's network that consists of 12 measuring devices of PM<sub>2.5</sub> concentration. Citizens can be informed about the values of PM<sub>2.5</sub> concentration in real time from the unique online network in the city of Volos, through the website <http://greenyourair.org/>.

The diagram below shows the instantaneous values of the PM<sub>2.5</sub> concentration for the period from 07/12/2020 to 13/12/2020.

Daily mean values of PM2.5 from 07/12/2020 to 13/12/2020 in the region of Volos
